

Federal Credit Union uses SIEM to reduce risk via real time detection and simplify security operations

Client Profile

- Federal Credit Union with \$2.2 billion in assets
- 22 branches and more than 200K members
- Actively use more than 200 applications
- Compliance requirements to multiple regulatory agencies with audits multiple times per month
- Regulated by National Credit Union Admin
- Geography: USA

Business Objectives

- Institute real time protection 24/7, 365 days of the year
- Reduce costs and improve operations
- Ensure compliance; Audit reports on demand
- Protect private member information and institutional intellectual property
- Centralize and simplify data collection and correlation for more predictive analysis and effective action plans

Challenges

- Evaluate data across geography & network topologies
- Maintain member confidence
- Enhanced visibility into norms & anomalies of data activity
- Continuous monitoring for variety of platforms like Windows, Linux, Virtualization as well as network appliances
- Overwhelming amounts of log to review
- Limited human resources & bandwidth
- Heavily & meticulously audited; need to demonstrate control & proactive processes

Solution

- Continuous Monitoring 7/24/365
- Integrated SIEM/Log from cloud for all devices
- Intelligent correlation and forensic analysis of data to determine threat & response
- Safeguard against unexpected or disallowed patterns of behavior
- Automated audit reporting
- Single point of reference for all data types
- Integrate with any configuration of security solutions
- Minimal impact on infrastructure

Results

- Reduced risk via real-time detection, alert, response on all suspicious activity
- Ability to drill down transaction to a specific device in a specific branch
- Simplified administration with centralized dashboard and alert indicators
- Single point of access captures 20x the activity that pre-existing processes recorded
- Reduced compilation and review of compliance reports to a fraction of time
- Predictive analytics allow for proactive prevention of incidents
- New operational efficiencies, legal support
